

About New Smart System

New Smart System is a new company, founded in 2006 by Anders Christensen in Denmark.

Based on his experience from more than 15 years in manufacturing and distribution (D-PAC Audio a.o.) of various brands for professional audio world, Anders begun to assemble a team of dedicated professionals in order to provide the best product available at the best price/performance ratio possible.

The result now unveils in New Smart System. A group of very talented people under management of Anders Christensen.

The group includes:

- Acoustic experts
 - Sound technicians
 - Musicians (acoustic and electric)
 - CAD and mechanical engineers
 - Electronic power and audio engineers
 - DSP and microprocessor engineers
 - Dedicated and professional sales people
- The group includes people with high education like professors, phd's and Msc's, and other people with life-long practical experience, giving the perfect mix between theory and practice.

For the next years, the plan is to develop further products, first to fill the current series with attractive products, and also to fill the full line of professional needs.

This includes:

- Line Arrays
 - Amplifiers (including DSP and built-in-loudspeaker models)
 - Super Versatile series
 - Studio Monitors
 - Hi-Fi systems (high-end)
- In the more distant future, AV products may emerge.
