

## Fotis is smart and buys 40 pcs. MP-15 from New Smart System

Fotis Sound of Poland, one of the biggest and most respected sound companies in Poland, recently purchased 40 pcs. MP-15 from New Smart System, and immediately put them to use in various events throughout Poland with great success.

Mr. Fotis states: "The MP-15 has proven to be very successful with both artists and monitor engineers. I consider the investment in MP-15 as one of the best investments I have done in many years."

The MP-15 is an 15" + 1,4" (3" VC) high power multi-purpose loudspeaker, and can be used as stage monitor, on a stick, flown or installed. The loudspeaker components are selected from Eighteen Sound's standard catalogue, providing easy replacements in case of accidents.

New Smart System is a new company with focus on professional loudspeaker systems. The company is founded by Anders Christensen, and draws on his experience from more than 15 years of business in pro-audio world. Manufacturing and logistics are handled in Poland, making it possible to maintain a very attractive pricing structure and short delivery times.
